OverviewHistoryTechnologiesCore network architectureFrequency bands and coverageApplication areasPerformanceStandards

5G is the fifth generation of cellular network technology and the successor to 4G. First deployed in 2019, its technical standards are developed by the 3rd Generation Partnership Project (3GPP) in cooperation with the ITU's IMT-2020 program. 5G networks divide coverage areas into smaller zones called cells, enabling devices to connect to local base stations via radio. Each station connects to the broader telephone network

## **5G and Energy Efficiency**

---

For Dorina Dragomir and Cristina Gheorghe, as stated in their research entitled "Energy efficiency for 5G mobile communications"<sup>18</sup>, 5G energy efficiency could be increased through:
