

# **800G Active Optical Cable for Slovenian Power System**

## Overview

---

The 800G OSFP Active Optical Cable is designed for 800 Gigabit Ethernet links over OM4 multimode fiber. The built-in digital diagnostics monitoring (DDM) allows access to real-time operating. Product is available in OSFP form to satisfy the different host system requirements. The signal integrity severely stressed under high-speed data transmission is enhanced via advanced ighest flexibility. The 800G Active Optical Cable (AOC) series redefines data-center interconnect performance by combining the simplicity of a pluggable copper cable with the reach and signal integrity of embedded optics.
