

A cable laying rack for communication optical cables

Overview

Fiber optic rack panels are designed to host and manage optic cables in communication systems, ensuring efficient cable management for easy installation. Belden offers a complete line of open frame racks and cabinets that support all applications, from single-rack or cabinet applications (such as retail and telecom closets) to high-density, multi-rack/multi-cabinet patching and switching fields (in computer rooms, data centers and central offices). These multi-purpose racks and cabinets comprises a lightweight aluminum frame with a variety of accessories for the termination of optical fibres.
