

# **AI Computing Power Storage Server**

## Overview

---

An all-in-one Edge AI computing platform integrates storage, virtualization, and computing power to help enterprises efficiently, securely, and cost-effectively deploy on-premises AI applications — accelerating smart transformation across industries. We power AI from grid to core - Enabling best-in-class AI server rack system efficiency, power density, thermal performance and reliability To meet accelerating AI compute demand, next-generation processors will need 2-4 kW per GPU, pushing rack power toward 1 MW+ by 2030. Maximize operational productivity and deliver transformative results for your enterprise infrastructure located in the data center or at the edge. Provides Direct customers with B2B Self Service tools such as Pricing, Programs, Ordering, Returns and Billing. Artificial intelligence (AI) is being adopted across all industry sectors and the growing need to run AI (as well as machine learning, or ML) workloads is placing considerable demands on servers.

## AI Computing Power Storage Server

---

### Axe series 2U GPU Servers

---

The AXE-7220 series comprises compact 2U short-depth AI GPU servers built for high-performance edge computing. Each model integrates powerful single-socket
