

# **Adjusting the door of the network cabinet**

## Overview

---

Deactivate one or all hinges on small or light doors to control the close speed. Cabinet doors are nominally aligned when shipped and may require adjustment before installation. The front door's hinge/pins sit in holes on the top and bottom panel (see yellow arrows): It is important to establish a good front. Any way you can run the cables through the wall from the networking cabinet into the main cabinet to the right, and store all of your networking gear in there?

Mount the router to the wall above wires door from the outside and drill some hole through the door for the cables. Additionally, the guide explains how to remove and reinstall cabinet doors for easier installation and maintenance.
