

# **Appropriate wire cross-section for construction site electrical distribution box wiring**

## Overview

---

Use high-temperature resistant copper core wire, and the cross-sectional area should meet the load current requirements. In this guide, we'll break down everything you need to know to install a distribution box correctly and confidently. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. This fact sheet explains how to apply the requirements shown in AS/NZS 3012:2019 Electrical installations - construction and demolition sites (AS/NZS 3012:2019), which is called up as a mandatory standard by section 163 of the Work Health and Safety Regulation 2025 (WHS Regulation). This technical article covers recommendations for choosing cross-sections of the wiring conductors inside switchboards, their connection methods, various wiring dos, don'ts and precautions in protecting from short-circuit and magnetic effect. The following is a detailed analysis:
