

Cable tray connecting plate bolt fixing

Overview

The fittings can be fastened to the cable tray rail either with double clamps of type DOP A2 or with truss-head bolts of type FRS and combination nuts. The exceptions to this are vertical bends, adjustable bend elements and fittings with a side height of 35 mm. The most common cable tray connection methods include: Each method differs in installation time, cost, flexibility, and strength. Designed as a three-piece staked bolt, washer, and nut combination, this kit is easy-to-use when connecting straight sections of cable tray and.

Cable tray connecting plate bolt fixing

Beama Best Practice Guide , Installation Of The System , Cable

Place the next straight length across the next support and attach it to the previous length with a pair of coupler plates and relevant fixings with the bolt heads on the inside of the cable ladder or cable tray

Mounting instructions

To avoid transverse bending at higher loads, a joint plate must be used in the joint area of the cable trays to be connected for tray widths of 400 mm or more. Up to a tray width of 300 mm, the mounting

Working with EzyTrays

Unlike the CT range of tray, the ET range does not come with pre-made fittings, rather, it uses accessories that allow you to bend, rise, or join straight lengths
