

Can I connect a router without fiber optic internet

Overview

Thus in conclusion it can be said that yes, Wi-Fi can indeed provide a good solution for wireless networking without a fiber optic internet supply. The reason I ask, is that the customer service rep for Zply says that I will not need to purchase a modem and that the router I linked them: link will be able to be hooked up straight to the fiber they are installing. While wired internet solutions are typically faster, wireless solutions are usually easier to set up. Looking for a good way to get online, without using broadband?

In this guide, we've walked through five of the best alternatives to fixed-line broadband in the UK right now, which you can use to get internet access without a traditional broadband connection.
