

# Communication tower collapsed

## Overview

---

More than 25,000 ComEd customers lost electricity Friday after a communication tower collapsed onto a high-voltage transmission line in Carol Stream, Illinois, knocking out power across several DuPage County communities. Masts and towers can collapse as a result of natural disasters, such as storms and fires; from engineering defects; and from accidents, sabotage or warfare. A 25-year-old worker performing cell tower maintenance was killed when he fell 50 feet.

## Communication tower collapsed
