

Congo electrical distribution box manufacturer construction project

Overview

Langsung Electric was involved in supplying a series of distribution boxes for the 220kV transmission line from Gilli to Maluku, along with the Maluku 220kV substation, part of a large-scale project aimed at upgrading the electricity grid in the Republic of Congo. Congo Energy offers products that reduce consumption while optimising the quality of installations. This project focused on deploying modular switchgear systems that could be manufactured, shipped, installed, and commissioned with minimal. This article examines the real challenges of African factory power systems and presents a practical Congo distribution cabinet design case featuring a 5-channel intelligent interlock solution. We are committed to setting new standards and becoming a trusted reference in our field.
