

Connect the fiber optic transceiver to the switch port

Overview

Connect the other end of the cable to a 10/100/1000 or SFP port on a network device. They provide high-speed data transmission and allow flexibility in choosing different types of fiber optic or copper cables depending on the needs of the network. In this step-by-step guide, we will walk you through the process of installing and removing SFP transceiver modules to ensure proper. This article describes steps to perform when SFP/SFP+ fiber link is not coming up. Using an HP 24-port switch and a MikroTik router, the video showcases how to connect devices via multi-mode LC connectors and effe.
