

# **Connection between distribution box and circuit**

## Overview

---

Wiring Direction: Wiring between the main circuit breaker and each branch circuit breaker in the box generally goes on the left, and the wiring out of the distribution box generally goes on the right. Connecting a distribution box correctly is essential for the safe and effective management of electrical circuits. It serves as a central hub for distributing electricity throughout a building, ensuring that power is delivered safely and efficiently to all the required locations.
