

# Core Switch 4507

## Overview

---

The new 4507R-E series is a mammoth switch that allows a maximum of 320Gbps (full duplex) switching capacity by utilising all 7 slots, in other words 5 modules alongside with two Supervisor Engine 6-E cards (with two full line rate 10Gb Uplinks). The Cisco ® Catalyst ® 4500 Series Switches enable Borderless Networks, providing high performance, mobile, and secure user experiences through Layer 2-4 switching investments. Converged voice/video/data networks with high availability enable business resiliency for enterprise and metropolitan. The Foundation Series offers a roadmap for Catalyst Center lifecycle management, encompassing exploration of use cases, varied installation small query that the Cisco documentation could not clarify. I know that the Catalyst 9500 series and 4500 -X series switches support Stackwise Virtual. It supports high-density Gigabit Ethernet and 10 Gigabit Ethernet interfaces, providing scalability and flexibility for.
