

# Core Switch Expansion Slots

## Overview

---

Port option cards and versatile interface modules (VIMs) are installed in dedicated slots at the back of the switch to provide optional I/O ports or stacking ports. These optional items add 10-Gbps copper or fiber I/O ports to the back panel of compatible switches. H3C S6520X-SI Series Switches—Industry-leading high performance and scalable 10GE access switching solution with modular dual power, fixed or modular uplinks (10GE/40GE) and IRF for resiliency. Applied to the aggregation layer of large networks, the core of small and medium-sized networks, the access of server clusters, and the full Gigabit three-layer access of large enterprises or campus office buildings Rich port types, 48 x 1GE optical ports, 4 x 10GE optical ports for uplink VSU. ECS4620-28F has with 1 x RJ45 console port, 1 x USB type A storage port, RPU connector. This chapter provides an overview of the Cisco Nexus 5000 Series switches, which include the Cisco Nexus 5000 Platform switches and the Cisco Nexus 5500 Platform switches. The EX4600 base switch provides 24 fixed 1GbE SFP/10GbE SFP+ ports<sup>1</sup> and 4 fixed 40GbE QSFP+ ports, providing the flexibility to support mixed 1GbE, 10GbE and 40GbE environments.
