

# **Croatia Outdoor Optical Cable Installation Project**

## Overview

---

Telemach plans to install 4,000 kilometres of fibre-optic cable across Croatia and is preparing for the commercial launch of the 5G mobile network as soon as the HAKOM regulator allocates the frequency spectrum, the company announced at a press conference in Zagreb on Monday. We are one of the leading providers of high-speed data transmission services in the Republic of Croatia. Whether a complete network and equipment of data centers or a renewal of the office infrastructure is pending - we offer you completely future-proof solutions. This fiber-to-the-home access network involves deploying fiber optic cables from the main FTTH Central Office (CO) through a flexible distribution point with splitters to the end-user, without utilizing active equipment between the network's starting and ending points.
