

Dedicated CAD plugin for power distribution boxes

Overview

Eaton has joined forces with Autodesk to create a new plug-in for Autodesk Revit that allows consultants to configure electrical components and systems and dynamically generate detailed BIM files. Batch and script utility for processing multiple Autodesk® AutoCAD® drawings. Then you need PowerCad-5 — the #1 choice in electrical engineering design software. Perfectly design, model and spec the power distribution network in your next construction. Your electrical design and calculation job will be more efficient without the hassle to switch between different design tools and to rework the single line diagram due to different design environment. Whether you're looking for something for a particular market, BIM software, or brand you can find it here.
