

# **Denmark Cable Management Plan**

## Overview

---

The JFK & Storstrømmen project is part of a Danish national initiative to move the majority of power cables underground by 2030. The development plan is based on needs tations and connections have been expanded. As the cables would be installed throughout Denmark, the customer wanted to select a company. The Government is now moving forward with an assignment for Svenska kraftnät, Sweden's power grid authority, that allows for a planned renewal and upgrade of an electricity cable connection to Denmark to be put on hold. 4 GW electricity interconnector between Bicker Fen in Lincolnshire, Great Britain (GB) and Revsing in South Jutland, Denmark. Denmark's neighbouring countries now want to step up the monitoring, while Denmark is hesitant.
