

# **Diameter of armored 24-core optical cable**

## Overview

---

Featuring 24 singlemode fibers with a core diameter of 9  $\mu\text{m}$  and a cladding diameter of 125  $\mu\text{m}$ , this cable is designed to provide excellent optical performance with minimal signal loss. The optical fiber elements are typically individually coated with layers and contained in a protective tube suitable for the environment where the cable will be deployed. Hydrolysis resistant and special tube filling compound ensure a critical protection of fiber. Specially designed compact structure is good at preventing loose tubes from shrinking. Steel wires ensure tensile strength, PE sheath protects cable from ultraviolet radiation. Small diameter, light weight and easy installation.

## Single-Mode Fiber Cable Guide: Types, Specs & Selection

---

Single-mode fiber optic cable (SMF) is a type of optical fiber designed to carry a single ray of light mode directly down the fiber core. With a typical core diameter of 8-10 micrometers ( $\mu\text{m}$ ),
