

# **Disable DHCP on 360 Fiber Optic Router**

## Overview

---

Briefly: login as admin to the device; go to LAN IP settings under the Advanced Setup tab; use your browser's javascript debug facilities to set a breakpoint on the source line that tests user\_id in function 'hide\_dhcpServerStat ()'; reload the page and when it stops at the. Will it be sufficient if I turn off DHCP on ISP provided router, then set up my router static IP address, and run my own router in router mode, rather than AP mode?

I understand I will need to make sure there will be no conflicting IP addressess, so eg. Right now my config is: ISP Fiber router/modem (10 Gbps) -> ethernet -> Deco Be65 Main -> 2. This Photo Is Not Edited, Look Closer at the Gilligan's Island Blooper So I Proved Her Wrong!" No description has been added to this video. Enjoy the videos and music you love, upload original content, and share it all with friends, family, and the world on YouTube. Dynamic Host Configuration Protocol (DHCP) is a critical feature in most home and business routers. It automatically assigns IP addresses to devices in a network, simplifying connectivity and management.

## **Disable DHCP on 360 Fiber Optic Router**

---

### **Where to find your router model number?**

This is typically located on the exterior of the router, along with your IP address and static address, router user network information, password,.
