

Distance of gigabit fiber optic cable

Overview

Let's dig deeper into the numbers for full details of your fiber optic cable range: 1 GB/s Network - An OM1 cable supports 1000BASE-SX up to 275 meters, increasing to 550 meters with an OM2 cable. Many factors decide the fiber cable distance, but the key factors include the below six aspects. Fiber optic cable transmission distance is determined by two primary physical factors that affect signal quality as light travels through the fiber medium. Even details like connector quality, splicing, and cleaning practices impact maximum optical cable reach. When choosing a fibre optic cable for a permanent trunk link you should consider three things: 1) what is the distance of the cable run, 2) what bandwidth do I require now, and 3) what might I need in 5, 10 or 15 years time, or what future proofing do I want?

Installation costs can be as much as.
