

Distribution Box Light Distribution Diagram

Overview

This AutoCAD DWG file includes a complete Single Line Diagram (SLD) of a Distribution Board, showing circuit breakers, wiring connections, and load distribution for lighting, power, and mechanical systems. The luminous intensity value in candela (cd) for a given luminaire is obtained by multiplying the value in cd/klm read from the diagram by the total luminous flux in kilolumens (klm) of the lamps used in the luminaire. The diagrams also show the half beam angles (solid line, $C 180 - C 0^\circ \beta = 28^\circ$). The portion of the graph above the horizontal 90° - 270° line indicates light that shines above the fixture (indirect), while the portion of the graph below represents light shining.

Indication Lights: These provide visual availability and status of mains power supply. Smart DB boxes have extra parts like energy monitoring units and communication modules. 4) and the average degree of illuminance of this area in relation to the distance.
