

Distribution box break point

Overview

A "DP box," or Distribution Point box, is a type of enclosure used in telecommunications to house and organize connections, typically in a network involving fiber optic or copper cabling. It serves as a junction point where multiple lines can be terminated and distributed to. But what exactly is a power distribution box, and why is it so essential in our daily lives?

The DB panel board controls the flow of electricity. It houses protective devices such as circuit breakers or fuses, ensuring both equipment protection and user safety. Distribution Board or DB is an electricity supply system or a common enclosure that distributes the electrical power feed into subcircuits.
