

# **Do I still need to buy a router if I m getting fiber optic internet to my home**

## Overview

---

You don't need a special router, per se, but you do need one that can handle the speed fiber provides. If you're paying for gigabit fiber service, make sure your router supports at least gigabit Ethernet ports and dual-band or tri-band WiFi (like WiFi 5 or WiFi 6). Routers designed for DSL (which uses phone line inputs) or cable (which uses coaxial inputs) won't work. Let's take a closer look at the fiber to the home equipment you'll need and answer some of the most common questions about.
