

# **Do cable trays really need covers**

## Overview

---

Cable tray covers not only offer physical protection to the cables but also enhance safety, improve system stability, and elevate the overall look of your installation. Whether you are working in high-traffic office spaces, corrosive industrial environments, or aesthetic-sensitive areas like hotels and shopping malls, the importance of selecting the right cover is understood. It is understood that cable trays in the construction of installation often encounter some site to install protective cover, but what is the specific situation?

Now let's see why the cable bridge should be protected. maintain spacing or to keep cables in place when the tray is bent the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require.
