

Dual-port optical information socket LC module

Overview

Compact, industrial housing with SFP interface and LC duplex socket for immediate connection of a fibre optic patch cable to network devices such as switches, routers or firewalls. The 10G SFP+ optical transceiver is a small pluggable optical module with a current maximum rate of 10. It is can be divided into rate classification, wavelength classification, and mode classification. Our new SFP modules with LC duplex connection are compatible with many switches with an SFP interface.
