

# **Eastern European Aluminum Alloy Fiber Optic Channel**

## Overview

---

The project aims to enhance Europe's digital infrastructure with two scalable cable landing stations, modern high-fibre-count cables, and upgrades to existing In-Line Amplifier (ILA) facilities across the UK, Belgium, and the Netherlands. EXA Infrastructure is the go-to choice for hyperscale internet backbones due to our owned modern network infrastructure. Our Aluminium Action Plan outlines 6 essential steps for a competitive European industry. Read our strategy and policy recommendations for reaching net-zero emissions across our full value chain. Exail provides specialty optical fibers coated with Aluminum to operate under harsh environments. Leveraging the R&D work of the 3F2E project to develop metallic coated fibers, Exail's aluminum coated fibers can operate from cryogenic temperatures up to +400°C. Yuyao Jera Line, a world-leading manufacturer of cable infrastructure solutions, has built a solid reputation for delivering reliable fiber optic cable products and comprehensive solutions tailored to global needs.
