

Equipment Box Fiber Reinforcement Tray

Overview

FCT FRP Cable Trays are designed specifically for electrical and instrumentation installations, utilizing corrosion-resistant fiber reinforced plastic. Fibre casting, also known as moulded pulp, is a sustainable material produced using a wet pressing process. This involves sucking an aqueous fibre pulp made from recycled paper or cellulose into a mould and then drying it. Molded Fiber Glass Tray Company is comprised of over 300 different material handling trays, containers and wash boxes for material handling and processing solutions in an array of industries, including chemical, rubber, metalworking, machinery, electronics, transportation and utilities. Ebo has been part of the Niedax Group since 2010 and is one of the global market leaders in the field of GRP cable support systems. The splice trays are according to DIN 47662 and Telecom standards, each tray can hold up to 12.
