

Explosion-proof distribution box circuit breaker configuration

Overview

This can typically be done by isolating the circuit at the main power supply or circuit breaker. Ensure that all cables, connectors, and components used are suitable for explosion-proof applications. Explosion-proof electrical equipment, such as explosion-proof distribution boxes, is specifically designed for hazardous environments where flammable gases, vapors, or dust may be present. Today, more than 3/4 of hazardous location installations are done in Class I, Division. From its global facilities ABB manufactures a wide range of ATEX, IECEx, UL, CSA approved electrical products for hazardous area applications.
