

Fiber Optic Cable Monitoring Marker

Overview

The Fiber Optic Cable Marker is designed to visibly identify Fiber Optic cable locations on a wood utility pole. When excited by any standard marker locator, the marker ball produces a 5-foot spherical RF. Fiber optic networks are the backbone of modern communication and control systems, both in telecommunications, rail and road transport, and in energy and industrial infrastructure. HellermannTyton products are sold through a national distribution network that supports you before and after the sale.
