

# Fiber Optic Coupler Models and Manufacturers

## Overview

---

Fiber couplers (or fiber-optic couplers) are passive optical devices that redistribute light between multiple optical fibers. While the term is sometimes loosely used for hardware that couples free-space light into a fiber (properly called fiber launch systems), this category primarily refers to. PM fiber components; patch cords, splitters/combiners, polarizers, isolators, fused/PLCS couplers, test equipment; PER meter, polarized sources, PDL emulators, polarization. Also, please take a look at the list of 13 fiber coupler manufacturers and their company rankings. We offer a full line of fiber optic couplers and splitters supporting SM, MM, PM, large core, and double-clad fibers across 300–2000 nm, with power handling up to 100 W and operating temperatures up to 300°C. Three fabrication methods are employed: fusion, micro-optics, and planar lightwave circuit.
