

Fiber optic cables used in the computer room

Overview

Fiber network adapters allow for high-speed fiber connections directly to your computer without converting to copper Ethernet cable. A pair of fiber to Ethernet media converters can create a beneficial electrical barrier when running Ethernet between buildings or to outdoor Power over Ethernet (PoE) devices such as. Fiber optic cables are used for long-distance and high-performance data networking. Unlike copper wires, which are limited by lower data transmission speeds, shorter transmission distances, and higher susceptibility to electromagnetic interference, fiber optic cables offer unparalleled performance and can.
