

Fiber optic communication accessory guide pin

Overview

Guide pins are used to guide and align MPO optical fiber connectors to ensure precise connection. Based on the accuracy of the guide pins there are three main categories available. US Conec manufactures durable, composite, Polyphenylene Sulfide (PPS) based thermoplastic ferrules available with up to 72 fiber holes that terminate 125 micrometer optical fiber. Fibre optic cables can be used in a huge variety of applications, from small office LANs, to datacentres, to inter-continental communication links.
