

Fiber optic connection to Xiaomi router not working

Overview

Many fiber internet problems come from dirty connectors or loose plugs, not major faults. Power cycling or restarting your ONT (Optical Network Terminal) often resolves simple troubleshooting internet issues. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. I need information on what settings I need to configure on my router to access Internet via fiber optic modem. Hi after my Xiaomi AC2350 router gave that error to me i searched up google,duckduckgo and bing about it but nothing serious showed up about this issue let me tell you how i get rid of that problem You need to reset the router first some people says it solves this problem but in my case it didn't.
