

Fiber optic installation with 2 routers

Overview

Yes, you can connect two routers to one fiber modem, but understanding the 'how' and 'why' is crucial for optimal network performance. The router connected to the ONT will be your Internet gateway router for itself and the other router, we'll call "Router 2" for the example. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. However the real problem is how to create a balance, so assume room A is torrenting and taking up 90% of your internet bandwidth, then.
