

# Film module not working

## Film module not working

---

### **[CLOSED, UNSOLVED] Unable to run Waydroid. Binder modules not working**

---

The module will probably have to be rewritten (Disabling ibt with `ibt=off` in the kernel commandline should theoretically work, but is not a good solution). Maybe the `binder/binderfs`

### **camera module 3 not working.**

---

Use a fresh OS installation, boot your Pi and the camera should just work. Re: camera module 3 not working. Have you enabled the old legacy camera stuff? That will break `libcamera`
