

Flame-retardant cold aisle for Portuguese data centers

Overview

Offers high insulation, flame resistance, and privacy with excellent light transmission. Modern data centers require efficient thermal management, structural durability, and compliance with fire and safety regulations. Acme Plastics supplies high-performance data center containment plastics—including twinwall polycarbonate, solid polycarbonate, and acrylic sheets—engineered to support hot aisle and cold aisle containment. High performance containment systems help maintain a stable environment in mission critical server rooms by preventing hot and cold air. As these methods become more common, it is necessary to understand the complications they present to smoke detection due to the type of environment they create.
