## Overview

---

At a launch conference in Beijing, the Global Energy Interconnection Development and Cooperation Organization (GEIDCO) unveiled seven standards, including guidelines for planning new types of power systems, methods for assessing onshore wind energy resources and guidelines for. These findings are informed by research and insights from the WRI Polsky Center for the Global Energy Transition. GEI can comprehensively enhance the operating and differences in resources, time zones, seasons and electricity prices of different regions. GEI is a global emission reduction plan than can achieve the goals in Paris Agreement.
