

Grounding connection of cable entering the distribution box

Overview

Attach a ground wire from one of the threaded studs (A) at the bottom of the housing, to the mounting plate (B). 26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. Grounding systems aren't just boxes and wires - they're the silent bodyguards protecting people and equipment from electrical disasters. When lightning strikes or a rogue voltage surge decides to crash the party, proper grounding steps in like a seasoned bouncer, redirecting danger away from.
