

High-density agent for 4U switches

Overview

Ideal network solution with great compatibility for interconnect and cross-connect between active equipment in switches/switch tiers and servers within the data center. Offers high density integration of splitter, splice, WDM cassettes with convenient cable management and. Ultra High Density 4U modular cassette sliding Panel, accepts (24) G2 modules or MPO panels, providing up to 288 duplex LC ports or up to 192 MPO ports. Finish making your selections or clear them to view relevant specifications. Hardware Kit contains: Screws (12-24); Screws (10-32); 8 Velcro cable tie; Tie Wraps. Ensure sufficient vertical clearance above the panel to allow proper access to the top tray's latch mechanism. h panels have been engineered to be able to significantly increase density for both patching and splicing.
