

# **How long do solar power combiner boxes typically last**

## Overview

---

What's the lifespan of a combiner box?

With proper maintenance, a PV combiner box should last the lifetime of your solar installation—typically 20-25 years. A solar combiner box is a crucial component in solar energy systems, designed to consolidate the outputs of multiple solar panel strings into a single output that connects to an inverter. Unlike solar panels with 25-year warranties, combiner boxes typically last 8-15 years depending on three key factors: "We've seen coastal installations require replacements 40% sooner than desert systems due to salt corrosion.
