

How many megabits of router are needed for a 1000 Mbps fiber optic connection

Overview

Fiber optic internet is currently the fastest and most reliable internet connection. To put it in simple terms, this means you could download large files, stream ultra-high-definition videos like 4K movies, or play online games without any lag. A gig fiber connection will provide around 1,000 Mbps download and 1,000 Mbps upload —but you won't always see those numbers if you run a speed check on your computer.

How many megabits of router are needed for a 1000 Mbps fiber opt
