

# How many square millimeters is the cable for a temporary distribution box

## Overview

---

Therefore, you would select the next standard cable size, which is typically 25 sq mm, to ensure safety and compliance with regulations. FAQ What is Electrical Wiring?

Electrical wiring is the structured network of conductors and cables. This network distributes electricity safely within a building, vehicle, or industrial setup. Eland Cables' Cable Size Calculator can help you determine the most appropriate cable size for your installation against British and IEC standards. Undersized cables can lead to: Energy inefficiency: Higher  $I^2R$  losses increasing.
