

How much does a fiber optic module cost

Overview

The average 10G SFP price typically falls between \$10 and \$300, depending on the module type, transmission distance, and brand. For most standard enterprise and data center deployments, the practical buying range is much narrower—and far more predictable—than many price lists. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. His director had asked for a budget estimate for a data center-wide 400G system upgrade. Calculating the costs across 1,200 switch ports using standard Cisco list pricing, David watched the total QSFP-DD spend multiply. These elements collectively determine the unit price of fiber optics, which can range from tens to hundreds of dollars per kilometer.
