

How to change the router when replacing your home fiber optic cable

Overview

Disconnect Current Router: Safely remove the previous router and store the cables. Follow these simple steps when connecting a WiFi 5 or WiFi 6 router (square-shaped on top): Connect the router to a power source. That's because it won't be Wi-Fi 7 compatible and is likely causing a bottleneck. You'll notice this as latency in critical apps, especially if your home is device heavy. To connect your fiber optic cable to a router, ensure you have the following: **Fiber optic modem (ONT):** Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. **Compatible router:** Verify that your router supports fiber optic input (look for an SFP or WAN port labeled).
