

# **How to configure IP address and router settings for mobile fiber optic connections**

## Overview

---

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance. Properly configuring your router will protect your information from prying eyes, securely connect all of the devices in your home to the internet, and even keep your children from looking at things they're not supposed to.
