

How to connect a fiber optic cable coupler

Overview

The simplest method: connect two cables pre-connectorized via a coupler (also called an adapter). Fiber optic adapters, also known as couplers, play a crucial role in fiber optic networks by providing a connection point between two fiber optic connectors. Are you interested in seeing how fiber optic connectors get mechanically plugged into an adapter?

This video goes over common types of connectors, their respective adapters, and how to properly connect and disconnect them. It enables optical signals to pass from one fiber to another with minimal loss, ensuring stable and reliable communication. There are many types of fiber optic connectors, including SC, LC, FC, ST, D4, MU, MT/MPO, etc.
