

# **How to connect the fiber optic cable to the disk array**

## Overview

---

Data transmission from the host to the array controller modules is through fiber-optic cables. The fiber-optic cables connect to the controllers through Small Form-factor Pluggable (SFP) transceivers (FIGURE 6-6). The HCP G11 Node s and the storage arrays must be in the same rack in an appliance configuration in order to set up a direct connection without Fibre Channel switches. **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem. Trademarks used in this text: Dell™, the Dell logo, Dell Boomi™, Dell Precision™.
