

How to set up a wireless router with a 300m fiber optic connection

Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. However, if you're not accustomed to some of the jargon, like MAC cloning and PPPoE, you may encounter a few. Fiber transmits data using light signals through glass strands, delivering faster speeds and lower latency than cable or DSL connections that rely on.
