Huawei S7700 Series Smart Routing Switches S7703 S7706 S7712

Huawei S7700 Series Smart Routing Switches S7703 S7706 S7712 The S7700 series provide service optimization features like wired and wireless convergence, unified user management, quality

S7703 Switch S7703 price and specs S7700 Routing

S7703 Switch is a new generation of high-end intelligent routing switches introduced by Huawei for the next-generation enterprise network architecture is widely

S7700 Series Smart Routing Switches

Huawei's Super Virtual Fabric 2.0 (SVF 2.0) technology can not only virtualize fixed-configuration switches into S7700 switch line cards but also virtualize APs as switch ports. With this virtualization

Huawei S7700 Series Smart Routing Switches Datasheet

The S7703-PoE/S7706-PoE differ from the S7703/S7706, because all power supply slots on the S7703-PoE/S7706-PoE are shared by the system power supply and

S7700 Series Smart Routing Switches

The switching capacity and port density of all three models is expandable. The S7700 is based on a new hardware platform, which adopts a left-to-rear ventilation channel to achieve better energy efficiency.

Installing S7703, S7703 PoE and S9703 Chassis

Installing S7703, S7703 PoE and S9703 Chassis Context Do not block the air intake vents (left) or air exhaust vent (rear) of the switch. Do not face heat sources of other devices towards the air intake

Huawei S7703 switch

Huawei S7703 switch basic engine AC combination configuration (including integrated assembly chassis, MCUA main control board*2, 800W AC power supply*2

S7703

Slot Configuration on the Chassis The S7703 chassis provides 3 LPU slots, 2 MCU slots, 2 system power supply slots, and 1 PoE power supply slot. Figure 4-6 shows the layout of

slots at the front of

S7700 Series Smart Routing Switches

Product Overview The S7700 series switches (S7700 for short) are high-end smart routing switches designed for next-generation enterprise networks. The S7700 design is based on Huawei's intelligent

S7703 PoE

The S7703 PoE chassis supports two redundancy modes of power modules: N+1, and N+0. You can run the `set power backup-mode` command to configure the backup mode of power modules. By default,
