

Independent support for cable tray tee

Overview

The vertical bend is pushed over the end of the cable tray and screwed tight. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resili- for each of these installation challenge-ience and safety.), MFIX (Mechanical Installation Support Systems) series for carrying Mechanical Installations (piping), E-Line Binrak (G profile) for all types of electrical, mechanical, industrial support. Cable supports are manufactured according to common standards from high quality raw materials. These tray systems allow excellent ventilation and prevent sagging while routing. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore.
